

DAUGHTERS OF MARY AND JOSEPH BISHESHE

Bisheshe is one of the beautiful and unique places to be. There are many reasons behind the beauty and uniqueness of this place among which are the natural, beautiful, serene environment, the people who live here and those who come to visit and train with us as well as the activities carried out in this place.

We are happy to share with you some of the activities we do in order to extend God's merciful love to all. We practice Sustainable Organic Agriculture (SOA) in animal husbandry i.e., cattle, goats, pigs, chickens and bee keeping. We also practice SOA under crop husbandry both in green house and open field. We grow field crops like bananas, maize, beans, Sweet Potatoes, vegetables, fruits as well as Agroforestry.

We carry out on site trainings to our co-workers, neighbours, students and all people wish to visit and train with us. We conduct a Functional Adult Literacy program where men, women and youth are trained in Cloth painting, sewing, knitting, crocheting, cookery, bakery, wine, candle, soap making as well as bead work. We have been affected by the effects of Covid 19 which hindered the smooth running of our activities. Through God's grace we are slowly getting back to normal.

We are very grateful to the DMJ Trustees, Misan Cara, Hilton foundation, CAFOD and all our benefactors who support us in our ministry. Together, we make visible

God's merciful love to all his people. Below are some of the photos taken during some of our trainings.
